Full-Stack Web Developer

Aspiring full-stack web developer with a strong foundation in JavaScript, React, Node.js, and MongoDB. Transitioning from a successful career in hospitality, bringing analytical thinking, problem-solving, and leadership skills to web development. Passionate about building scalable, user-friendly applications and integrating AI-driven solutions for businesses.

Technical Skills

- **Frontend:** JavaScript, React.js, HTML5, CSS3, Tailwind CSS
 - **Backend:** Node.js, Express.js, RESTful APIs, Authentication & Authorization
 - **Database:** MongoDB, Mongoose
 - **Tools & Technologies:** Git, GitHub, Postman, AWS S3, Docker (Basic), CI/CD (Basic)
 - **Concepts:** Agile Development, MVC Architecture, Component-Based UI, API Integration, State Management
-

Projects

Restaurant Management & Food Delivery Platform (*Graduation Project*)

- Currently developing a large-scale full-stack food ordering system with secure user authentication, dynamic menu management, and real-time order processing, ensuring a smooth user experience.
 - The platform features **two interfaces**: a customer-facing application and a **sophisticated admin and super admin dashboard**.
 - Designed and implemented a **light content management system**, allowing restaurant owners to efficiently manage menu items, update pricing, and track orders in real-time.
 - Integrated MongoDB with Mongoose, optimizing data storage, retrieval, and indexing for fast and reliable access.
 - Utilized React Context API for seamless state management, ensuring consistent UI updates and improved application performance.
 - Implemented AWS S3 for secure image storage, allowing restaurant owners to upload high-quality images of menu items.
 - Built a **state-of-the-art back-office** to manage operational logistics, business insights, and user analytics.
 - Designed and tested RESTful APIs with Postman to ensure efficient data communication between frontend and backend systems.
-

Professional Experience

Business Development Manager – Vkusno (*March 2024 – Present*)

- Partnered with top delivery platforms (Talabat, Careem, Deliveroo, Noon Food) to streamline food delivery operations.
- Developed and executed digital and offline marketing campaigns to enhance brand awareness.
- Managed website development and tech-related projects to improve customer experience.

Founder – The Cocktail Tree (*January 2022 – Present*)

- Built a consulting platform for hospitality businesses, focusing on digital transformation and AI-driven solutions.
 - Created industry-focused content and marketing strategies for brand visibility.
-

Education & Certifications

- **Full-Stack Web Development Diploma** – TeachMeCode Institute, Dubai
 - **Harvard CS50 (In Progress)** – Strengthening computer science fundamentals
 - **Certifications:** Strategic Planning, Data Visualization, Responsible AI
-

Additional Information

- **Languages:** English (Full Professional), Russian (Native)
 - **Soft Skills:** Leadership, Problem-Solving, Team Collaboration, Analytical Thinking
 - **Hobbies & Interests:** Tech research, fitness, digital marketing
-

Summary: Transitioning from a leadership role in hospitality to full-stack development, leveraging analytical and problem-solving skills to build innovative web solutions. Passionate about scalable applications, AI integration, and optimizing business operations through technology. Seeking opportunities to contribute to impactful projects in web development.

In addition: My decision to transition into web development stems from my passion for technology and its ability to create scalable, automated solutions. Throughout my hospitality career, I witnessed firsthand how digital transformation can revolutionize business operations, improving efficiency and customer experience. My strong background in strategic planning, leadership, and problem-solving has given me a unique perspective on user needs and business logic. By moving into tech, I aim to bridge the gap between business operations and digital solutions, building tools that drive efficiency and innovation across industries.

Looking ahead, I plan to deepen my technical expertise and transition into software engineering. My goal is to master **C, C#, Java, and Python** to expand my skill set beyond web development and explore opportunities in backend development, system architecture, and AI-driven solutions. This progression aligns with my long-term vision of developing robust, scalable software solutions that drive business efficiency and innovation. Throughout my hospitality career, I witnessed firsthand how digital transformation can revolutionize business operations, improving efficiency and customer experience. My strong background in strategic planning, leadership, and problem-solving has given me a unique perspective on user needs and business logic. By moving into tech, I aim to bridge the gap between business operations and digital solutions, building tools that drive efficiency and innovation across industries.
